

Questions for Oral Answers

1. **What is the main purpose of the research?**
How was the data collected?
What are the key findings?
2. **What is the significance of the study?**
How does it contribute to the field?
What are the limitations?
3. **What are the implications of the results?**
How can they be applied in practice?
What are the next steps?
4. **What are the strengths of the methodology?**
How was the validity of the data ensured?
What are the potential biases?
5. **What are the key variables in the study?**
How were they measured?
What are the relationships between them?
6. **What are the theoretical frameworks used?**
How do they inform the research?
What are the key concepts?
7. **What are the ethical considerations?**
How were they addressed?
What are the risks to participants?
8. **What are the practical applications?**
How can the findings be used?
What are the policy implications?
9. **What are the future research directions?**
What are the gaps in the literature?
How can they be filled?
10. **What are the key takeaways?**
What are the most important results?
What are the conclusions?
11. **What are the challenges faced during the study?**
How were they overcome?
What are the lessons learned?
12. **What are the overall findings?**
How do they compare to previous research?
What are the final thoughts?
