

Commencement of Public Business

- [illegible]

- $\frac{1}{2} \times \frac{1}{3} = \frac{1}{6}$ (The product of two fractions is the product of the numerators over the product of the denominators.)
- $\frac{1}{2} \div \frac{1}{3} = \frac{1}{2} \times \frac{3}{1} = \frac{3}{2}$ (Dividing by a fraction is the same as multiplying by its reciprocal.)
- $\frac{1}{2} + \frac{1}{3} = \frac{3}{6} + \frac{2}{6} = \frac{5}{6}$ (To add fractions, find a common denominator.)
- $\frac{1}{2} - \frac{1}{3} = \frac{3}{6} - \frac{2}{6} = \frac{1}{6}$ (To subtract fractions, find a common denominator.)
- $\frac{1}{2} \times \frac{3}{4} = \frac{3}{8}$ (The product of two fractions is the product of the numerators over the product of the denominators.)
