

Commencement of Public Business

- [illegible]

- **1. What is the main purpose of the study?**
The main purpose of the study is to investigate the effects of the new teaching method on student performance.
- **2. What are the research objectives?**
The research objectives are to determine the effectiveness of the new method, to compare it with the traditional method, and to identify the factors that influence student performance.
- **3. What is the significance of the study?**
The study is significant because it provides valuable insights into the effectiveness of the new teaching method, which can be used to improve the quality of education.
- **4. What are the limitations of the study?**
The limitations of the study are that it is a small-scale study, it is a short-term study, and it only focuses on the effects of the new method on student performance.
- **5. What are the conclusions of the study?**
The conclusions of the study are that the new teaching method is more effective than the traditional method, and that it has a positive impact on student performance.
- **6. What are the recommendations of the study?**
The recommendations of the study are that the new teaching method should be implemented in schools, and that further research should be conducted to explore the long-term effects of the new method.

Questions for Oral Answers

1. **What is the main purpose of the study?**
The main purpose of the study is to investigate the effects of the new teaching method on student performance.
2. **What are the research objectives?**
The research objectives are to determine the effectiveness of the new method, to compare it with the traditional method, and to identify the factors that influence student performance.
3. **What is the significance of the study?**
The study is significant because it provides valuable insights into the effectiveness of the new teaching method, which can be used to improve the quality of education.
4. **What are the limitations of the study?**
The limitations of the study are that it is a small-scale study, it is a short-term study, and it only focuses on the effects of the new method on student performance.
5. **What are the conclusions of the study?**
The conclusions of the study are that the new teaching method is more effective than the traditional method, and that it has a positive impact on student performance.
6. **What are the recommendations of the study?**
The recommendations of the study are that the new teaching method should be implemented in schools, and that further research should be conducted to explore the long-term effects of the new method.
7. **What is the importance of the study?**
The importance of the study is that it provides valuable insights into the effectiveness of the new teaching method, which can be used to improve the quality of education.
8. **What are the key findings of the study?**
The key findings of the study are that the new teaching method is more effective than the traditional method, and that it has a positive impact on student performance.
9. **What are the implications of the study?**
The implications of the study are that the new teaching method should be implemented in schools, and that further research should be conducted to explore the long-term effects of the new method.
10. **What are the future research directions?**
The future research directions are to explore the long-term effects of the new method, to investigate the factors that influence student performance, and to compare the new method with other teaching methods.

What are the main findings of the study? - the new teaching method is more effective than the traditional method
